

Wintel(Windows+Intel) Box

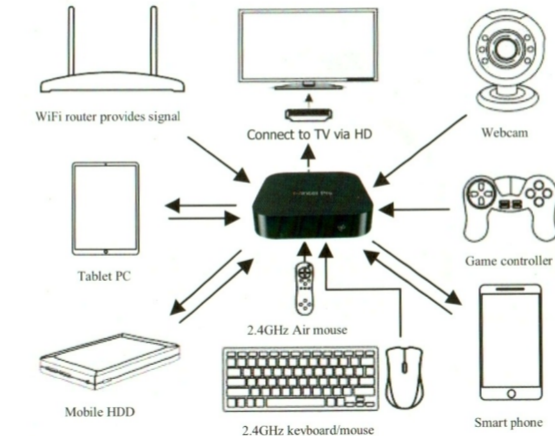

QUICK START GUIDE

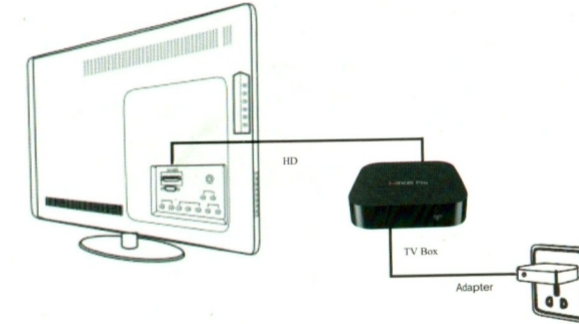

All I/Os

About Wintel Box

Connect the power and start up the box

1. Turn on the TV or monitor and change the video output to be HD.
2. Connect the Wintel box to the HD connector of the TV or monitor with a HD cable.
3. Connect the power adapter into the wall socket, and the other end into the DC port on the box.
4. Then the device starts and LED light on the box is on.

Power ON
Press and hold the Power Key for 5 seconds, the LED light will turn to blue after 15 seconds and enter the system.

Power OFF
If you want to turn off the unit, please do not unplug the power adapter directly. Press Power key once, the unit goes to standby, LED light turns to red. Press Power key once again, the unit wakes up, LED light turns to blue.

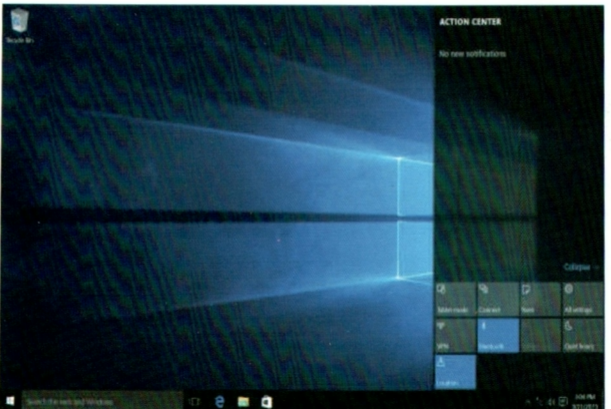

This is the Start screen of Windows10.
