## **SOUP KETTLE** **Instruction Manual**

SK-10      SK-10S

# I. Introduction:

Soup Kettle is one of the new electrometer products designed and developed by us, It adopts foreign advanced technology, international popular style, made by good quality stainless steel, tried and true. Main Body, made of the stainless steel, luxurious, good-looking and durable. With easy control and easy maintain function, it is the best choice for warming soups in food filed.

## II. Operating Steps :

1. Place the soup kettle on a solid , level surface
2. Open the lid and pour the water into the internal aluminum water tank. Take care not to over-fill with water. Under no circumstances should the stainless steel liner be filled to the top .Remove any excess water before use .
3. Turn the soup kettle between temperature control range 1-3. The indicator light will glow, showing that the unit is ON . Turn to OFF , the unit does not work .

Normally the temperature control should be set between range 1-2.  
Hold at high temperature when setting at range 3

### Note :

1. This soup kettle is not designed to cook soups or sauces, nor is it designed to reheating cold or frozen products .
2. Always keep the hinged lid attached and closed when not serving.

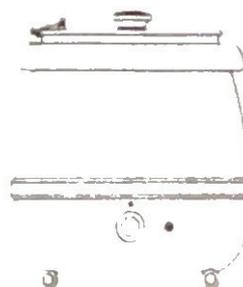

## III. Technical Specification :
